PERSONAL PROJECTS

Chat Bot <https://kiranbotspeech.ccbp.tech/>

- Designed and developed a Generative AI chatbot and voice chatbot. It increased customer engagement and satisfaction by providing instant and accurate responses. Integrated the chatbot with various platforms and systems for seamless user interaction.
- The technology used:- Machine Learning, LLM, OpenAI, Gradio, PlayHT, Hugging Face, etc.

INTRUSION DETECTOR

- This is a project on home Security and it is made using Raspberry Pi Pico and ESP32-Cam etc., it detects the motion of any intruder who tries to break into our house with a PIR Motion sensor. It captures the photo of the intruder by ESP32-CAM and notifies the owner through social media apps. It is also in favor of the owner's choice, the owner can control the door lock to catch the intruder.

Speed Typing Test <https://kirantypingpre.ccbp.tech/>

- It is an application to evaluate and improve typing speed. Creates a user-friendly interface to display the typing speed and accuracy to the user.
- Technology used:-HTML, CSS, JAVASCRIPT & REST APIs, etc.

Food Munch <https://kiranfoodmunc.ccbp.tech/>

- It is a web application. A website is designed for ordering the food menu by choosing items in a virtual menu with responsive layouts
- The technology used:- HTML, CSS, BOOTSTRAP, etc.
